

# Outcomes of IGO meeting – Bonn, Germany September 2018

In support of the Sendai Framework  
for Disaster Risk Reduction 2015–2030

# Main Objectives

- To facilitate an interaction with Regional IGOs on the use of the Sendai Framework monitoring system to support the Regional Monitoring of the Sendai Framework implementation.
- To provide an opportunity to these organizations to share their needs and expectations and discuss how the current design of the Sendai Framework Monitoring System would meet these needs.
- To enable the invited representatives from Member States to share their perspective on the emerging reporting expectations.
- To enable UNISDR to understand the requirements of the Sendai Framework Monitoring system to meet the needs of the Regional Reporting

# Main Outcomes

- It presented the regional IGOs with an opportunity to develop a common understanding of how the Sendai Framework Monitoring System could support the monitoring of DRR actions at the regional level, especially through their regional DRR strategies and plans;
- It facilitated interactions with select Member States who shared their current experiences on the use of the online Monitoring System as main target beneficiaries of the System;
- It helped UNISDR to garner a stronger understanding of the needs and expectations of the Regional IGOs and how far it could meet the same within the existing structure of the Monitoring System;
- It provided an opportunity for regional IGOs to share information about the frameworks and mechanisms of disaster risk reduction at the regional level that was an important contribution to the Global Assessment Report 2019

# Next Steps

- UNISDR will ensure that the Sendai Framework Monitoring system is available to the Regional IGOs to define and upload region specific custom indicators for monitoring the implementation of the regional DRR plans and strategies.
- The regional IGOs will coordinate with their respective Member States to ensure a delegation of reporting responsibilities among themselves for the regional level DRR monitoring based on the specific requirements of their respective regions
- The regional IGOs will further support their Member States on meeting their obligations of national level Sendai Framework monitoring
